Jane Doe

Machine Learning Engineer — Forecasting & MLOps

Hamburg, Germany · +49 170 0000000 · jane.doe@example.com · linkedin.com/in/jane-doe-example

English C2 · German B2 · Spanish (native)

Machine learning engineer who takes forecasting models from notebook to production. At ACME Logistics I built the demand-forecasting service used by 40 planners and cut forecast error by 18%; I run it with automated retraining, monitoring and drift alerts on Azure. M.Sc. Data Science, University of Example (grade 1.6).

EXPERIENCE

Machine Learning Engineer · ACME Logistics GmbH 03/2023 – present · Hamburg

Freight forwarder, 1,200 employees

- Built and own the demand-forecasting service (Python, LightGBM, FastAPI) used daily by 40 planners; forecast error down 18% versus the previous rule-based system.
- Set up MLOps on Azure ML: weekly retraining, model registry, data-drift alerts and a rollback path; incidents per quarter from 6 to 1.
- Introduced an evaluation suite of 300 historical weeks that every model change must pass before release.

Working Student, Data Analytics · Example Retail SE 04/2021 – 02/2023 · Berlin

- Automated weekly sales reporting (SQL, dbt, Power BI); 6 hours of manual work saved per week.

SKILLS

Machine learning	Time-series forecasting · Gradient boosting · scikit-learn · PyTorch · Model evaluation
MLOps & cloud	Azure ML · Docker · GitHub Actions · MLflow · Monitoring and drift detection
Data	Python · SQL · dbt · PostgreSQL · Power BI

EDUCATION

M.Sc. Data Science · University of Example — grade 1.6 10/2020 – 09/2022

Thesis: Probabilistic demand forecasting for perishable goods

B.Sc. Mathematics · Universidad de Ejemplo 09/2016 – 07/2020
